The eighteenth Miltenberger Emergency Services Seminar will be held on March 12, 13, and 14 at Rocky Gap Casino Resort in Flintstone, Maryland, along with an off-site course March 14. Please join us and participate in the excellent educational opportunities this program offers, along with the chance to enjoy the relaxing atmosphere in the mountains of Western Maryland.

The Miltenberger Emergency Services Seminar is designed to meet the continuing education needs of emergency services clinicians in Western Maryland and the surrounding area. The large diversity of workshops offered at this year’s seminar include EMS, Nursing, Fire, and Dispatch. A strong inter-working relationship among public safety and health care clinicians is the key to the successful outcome of any incident.

The program this year will feature a variety of pre-seminar workshops held Thursday and Friday and ending with the all-day seminar on Saturday. Some classroom spaces are limited in size, so please register early.

Dr. Benjamin J. Lawner will be the keynote speaker on Saturday. Dr. Lawner completed EMT training in 1994 and worked as a lead paramedic/firefighter for Alachua County (Florida). He graduated from Nova Southeastern University's College of Osteopathic Medicine in 2005 and completed his emergency medicine residency at the Univ. of MD. Ben has completed fellowships in emergency medical services, is a board certified EMS physician, and actively promotes pre-hospital and hospital based emergency medicine. He was awarded the 2018 Street Medicine Society’s John Pryor award for his contributions to prehospital medicine. Ben's interests include EMS research, medical education, air medical EMS, and critical care transport.

Registration Information
Pre-registration is required and must be received via our website, www.miltenbergerseminar.com, or at the MIEMSS Region I Office by March 2, 2020. Everyone registered by this date and attending will receive a t-shirt. Please register early to ensure yourself a place in this outstanding program. Registration confirmation notices will be mailed. If the confirmation notice has not been received by March 9, 2020, it is the responsibility of the attendee to verify that their registration has been received. Late registration will be accepted on a space available basis.

Cancellations
Cancellation notices submitted in writing to the MIEMSS Region I Office and postmarked no later than March 5, 2020, will be eligible for a full refund. If a registrant is unable to attend, another person may be substituted with a letter from the original registrant or sponsoring agency authorizing the substitution. No refunds will be issued for cancellations after March 5, 2020.

Fees
All workshops on Friday at Rocky Gap Casino Resort are $65. The registration fee for Saturday’s seminar is $90 and it covers all activities, including continental breakfast, breaks, luncheon, and printed materials. Payment may be made in the form of check or by credit card; there is a $30 fee for all returned checks. If your company or agency would like to be invoiced for the program, please contact the MIEMSS Region I Office at 301-895-5934 or 301-746-8636. Payment information must accompany registration. This affordable registration fee is possible due to the generous support of the Western Maryland Health System, Garrett Regional Medical Center, R Adams Cowley Shock Trauma Center, Maryland Emergency Number Systems Board, Emergency Medical Services for Children, US Acute Care Solutions, MIEMSS, and MFRI.

Continuing Education Credits
All workshops and lectures are approved for continuing education credits by MIEMSS. Conference materials will also be available to request continuing education credits from neighboring jurisdictions and other organizations.

Nursing Contact Hours
Western Maryland Health System (WMHS) is approved (PW 13-03-506-1001) as a provider of continuing nursing education by the Maryland Nurses Association, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation. WVBRN provider registration number is WV96-0009RN. The Saturday seminar provides contact hours as noted below. To receive nursing contact hours, participants are required to attend the entire session and submit the course evaluation.

Courses for Nursing Credits – T denotes Trauma Credits
Thu/Fri:  CPEN Review (16 hrs) T-6 hrs
        Sutting Up (8 hrs) T
        Stop the Bleed Instructor (7 hrs) T
Saturday: Care on the Bleeding Edge (1hr) T
        Strokes Come In All Sizes (1.25hrs)
        When’s the Last Time We Gave That (1.25 hrs)
        The ABC’s of TBI (1.25 hrs) T
        All Bleeding Stops (1.25 hrs) T
        Airway Tips, Tricks, and Tools (1.25 hrs)
        Be FAST (1.25 hrs)
        Advanced Trauma Assessment (3 hrs) T
        Thrill’em, Chill’em (1.25 hrs)
        Taking a Hard Look at Pediatric Deaths (1.25 hrs)
        Child Abuse (1.25 hrs) T

Schedule Changes and Right to Cancel
Every effort has been made to ensure accurate information in this brochure. However, due to unforeseen circumstances, it may become necessary to make changes to the schedule. The Miltenberger Emergency Services Seminar Planning Committee reserves the right to cancel or make changes in course offerings, presenters, and session times without prior notice to attendees.
Hotel Accommodations
A limited number of rooms have been reserved at Rocky Gap Casino Resort at special discounted rates for Miltenberger Emergency Services Seminar participants. These special prices can be guaranteed ONLY until Friday, February 14, 2020. After this date, the availability of discounted rooms cannot be guaranteed. The room rates are $109 per night plus tax and fees. All room rates are subject to state and county taxes plus $18 in additional fees. To obtain these discounted rates, please identify yourself as a participant of the Miltenberger Emergency Services Seminar. Please reserve your room early by calling Rocky Gap Resort at 301-784-8400 or 1-800-724-0828.

Directions to Rocky Gap Casino Resort
Take I-68 West to Rocky Gap State Park, Exit 50. Make a right off the exit. The resort is visible from the road.
Take I-68 East to Rocky Gap State Park, Exit 50. Make a left at the stop sign and cross over the bridge. The resort is visible from the road.

Directions to MFRI - Western Maryland Regional Training Center
Take I-68 West to Exit 42, US 220 S. toward Keyser, WV, keep left on ramp, turn left on US 220 S., continue approximately 3.7 miles, turn left onto Arnel Ave, then right on Hazmat Drive.
Take I-68 East to Exit 42, US 220 S. toward Keyser, WV, turn right on US 220 S., continue approximately 3.7 miles, turn left onto Arnel Ave., then right on Hazmat Drive.

Special Accommodations
If you require special accommodations, please provide information about your requirements when you register.

Additional Information
You may wish to bring a sweater for your own comfort. For additional information, please contact the MIEMSS Region I Office at 301-895-5934 or 301-746-8636. You may also want to visit Rocky Gap’s website at www.rockygapresort.com to check out the resort and other activities available during your stay.

---

Pre-Conference Programs at Rocky Gap Casino Resort

March 12 & 13, 2020

Certified Pediatric Emergency Nurse (CPEN) Review Course (Thurs. & Fri., 8 AM – 5 PM)
Presenter: Kara Bauman, MN, RN, CEN, CPEN, TCRN, Solheim Enterprises®
This two day preconference will be a comprehensive review course based on the detailed CPEN content established by the Board of Certification for Emergency Nursing (BCEN®). Through the use of lectures, graphics, videos and practice questions, the course will review many of the areas that are tested on the CPEN examination. This course will provide not only a knowledge base for successfully completing the exam, but also a foundation for further study as the participant works towards emergency nursing certification. This course cannot guarantee that all participants will pass the CPEN certification exam. It is the responsibility of the emergency nurse to take the necessary time to study and gain mastery of the required topics.
The course is ONLY open to nurses.
Speakers and materials for this course have been sponsored by the Maryland EMS for Children State Partnership Grant and EMSC Program. All fees associated with this pre-conference offering are intended to cover conference resort fees and meals.
Lunch will be provided both days.
Emergency Medical Technician Skills (Thurs. 6 PM – 10 PM & Fri. 8 AM – 5 PM)
Presented by University of Maryland MICRB Certified EMS Instructors
This session will provide students with the knowledge, skills and abilities to satisfy the 12 hour psychomotor requirements for Maryland EMT recertification. The student will perform skills related to patient assessment, oxygen adjuncts and delivery, CPR, AED, bleeding control and management of soft tissue injuries, musculoskeletal injuries and spinal immobilization.

Students must attend required classroom sessions on Thursday evening and Friday, be able to demonstrate proficiency in the practical skills evolutions, and obtain a score of 70% or better on the MIEMSS protocol quiz.

(12 Hrs BLS: S, ALS: NCCP Individual) Lunch will be provided on Friday.

March 13, 2020

Suiting Up for the Hot Zone: Identification, Special Isolation Transport, and Care for Patients Suspected with High Consequence Pathogens (Fri., 8 AM – 5 PM)
Presenters: Chad Bowman, MSN, RN, CFRN, CCRN, NRP; Lauren Sauer, MS; Jade Flinn, MSN, RN, CCRN, CNRN; Eric Leslie, BSN, RN; Noreen A Hynes, MD, MPH, DTM&H, FIDSA, FASTMH; Christopher Sulmonte, MHA; Elaine Nowakowski; Carrie Billman, BSN, RN, CIC

Ever wonder what it is like to provide care in the Hot Zone?

Suiting Up For the Hot Zone, created in partnership with the Johns Hopkins Biocontainment Unit and the Johns Hopkins Lifeline Special Operations Response Team, is an eight-hour course aimed at addressing relevant information in high consequence pathogen preparedness for those who would have initial contact with or transport a patient with a suspected or confirmed high consequence pathogen.

Our target audience is emergency nurses, emergency medical services clinicians or other healthcare workers who may care for this special patient population. The course will be a mix of didactic lessons and hands-on simulation training. The didactic material will cover the concepts of identify, isolate, and inform as well as special considerations for patients and healthcare workers. Hands-on simulation will include personal protective equipment (PPE) donning and doffing for enhanced contact precautions as well as clinical skills in PPE such as spill containment, waste management, healthcare worker down, patient transfer, and utilizing an isopod.

The course is limited to 20 students. Participants are encouraged to bring the PPE that they typically use when caring for a patient with a high consequence pathogen. If you do not have access to PPE, it will be provided for you. For PPE questions, please contact Chad Bowman at cbowma23@jhmi.edu.

(8 Hrs BLS: M, ALS: NCCP 3.5 Hrs National & 4.5 Hrs State/Local) Lunch will be provided.

Stop the Bleed Clinician – Instructor Course (Fri., 8 AM – 4 PM)
Presenters: Christopher Biggs, NRP, EMS Chief, Allegany County Department of Emergency Services; Wayne B. Tiemersma, NRP, EMS Chief, Garrett County Dept. of Public Safety; Elizabeth Wooster, PhD, RN, BSN, MS, MsEM, CEN, CPEN, CTRN, CFRN, CNRN, NRP, WMHS Emergency Services, Trauma Program Manager

Our nation has a history of learning hard lessons from wartime experiences; the case for hemorrhage control is no different. The Hartford Consensus directs that all responders have the education and necessary equipment for hemorrhage control and strongly endorses civilian bystanders to act as immediate responders. Immediate responders represent a foundational element of the ability of the U.S. to respond to these events and are a critical component of our ability to build national resilience. Immediate responders must be empowered to act, to intervene, and to assist.

We are a nation of people who respond to others in need. It is no longer sufficient to “see something, say something.” Immediate responders must now “see something, do something.”

This course teaches participants the basic life-saving medical interventions, including bleeding control with a tourniquet, bleeding control with gauze packs or topical hemostatic agents, and opening an airway to allow a casualty to breathe. The course is intended for Anyone and Everyone who may one day find themselves in a “see something, do something” situation. Course materials include a PowerPoint presentation and three practical skill stations.

This course will continue during the second half as a STB instructor course for those participants that qualify to become instructors as outlined by the American College of Surgeon-Committee on Trauma. Students will be mentored both in lecture content and style, communication skills for the general public along with practical skill station instruction.

(7 Hrs BLS: T, ALS: NCCP 3 Hrs National & 4 Hrs State/Local) Lunch will be provided.

Dispatch Course: 9-1-1: Hacked, Attacked and Where’s That (Fri., 8 AM – 4 PM)
Presented by The Public Safety Group, Wake Forest, NC

This class has been created to bring telecommunicators up to speed on the technological terrorism and the “Internet of Things” that are plaguing our 9-1-1 centers across the nation. We will discuss getting back to the basics of identifying ANI/ALI and mapping knowledge and the importance of understanding all of the information displayed. We will also review and hear examples of swatting, hoax calls, denial of service, and ransomware, as well as other situations that have temporarily paralyzed 9-1-1 centers. In addition, we will identify other technological speed bumps that are stumpng our call-takers such as VoIP calls, APPS calling 9-1-1, WIFI calling, cellular boosters and calls being routed to other countries. These types of calls do not always arrive in the PSAP via traditional means and it is important for telecommunicators to be ready for and understand the process for when they do.

(7 Hrs BLS: L, ALS: NCCP Individual) Lunch will be provided.
A schedule of the day’s program is presented below. There are five categories of training for you to choose from during the day. They are listed below and color-coded for your convenience.

6:45 AM: Registration and Continental Breakfast

8:00 AM: Welcome / State of the State

8:30 AM: Keynote Address – Care on the Bleeding Edge: Decompression of Trauma Related Myths

Presenter: Benjamin J. Lawner, DO, MS, EMT-P, FACEP, Assistant Professor, Department of Emergency Medicine
University of Maryland School of Medicine, Medical Director, Maryland ExpressCare Critical Care Transport

The care of prehospital traumatic injury has largely been focused on a “scoop and run” strategy. While time is of the essence in penetrating trauma, not all traumatic injury patterns are the same. Technological advances have brought hospital based interventions into the field, and EMS clinicians have more to offer than a fast ride to the trauma center. Discuss advances related to hemorrhage control, traumatic arrest, and debunk some long standing myths that have informed current treatment protocols. Discuss topics such as: blood administration, needle decompression, and police initiated transport of penetrating traumatic injuries.

(1 Hour BLS: T, ALS: NCCP State/Local)

9:30 AM: Break and Visit Vendors

9:45 AM: Breakout Session 1

(A) Strokes Come in All Sizes: Pediatric Strokes

Presenter: Lisa Sun, MD, JHCC, Pediatric Neurologist, Pediatric Stroke Program

Stroke can happen to anyone at any time - including teenagers, children, newborns, and unborn babies. A third of pediatric strokes occur in neonates and infants. Early recognition of strokes in children requires proper assessment and stabilization along with appropriate triage and transport decisions to minimize neurologic disability. Dr. Lisa Sun from the Johns Hopkins Pediatric Stroke Program will provide an update on the occurrence, symptoms, and sequela of strokes that occur in children. Case studies will highlight the difference between infants, children, and teens.

(1.5 Hours BLS: M, ALS: NCCP 0.5 Hours National & 1 Hour State/Local)

(B) When’s the Last Time We Gave That? – Infrequently Used Drugs and Drug Concentrations

Presenter: Rick Koch, Sr., Battalion Chief, Ocean City Fire Department

When you get the orders for the drugs you haven’t seen since pharmacology class what do you do? During this session we will review infrequently used drugs, cover the different ways these drugs are packaged, and how to get the proper dosage for your patient. Attendees will brush up on their drug calculations, concentrations, and the mixing of these elusive medications.

(1.5 Hours BLS: M, ALS: NCCP 0.5 Hours National & 1 Hour Individual)

(C) The ABC’s of TBI

Presenter: Or Cohen-Inbar, MD, PhD, Neurological Surgery, West Maryland Health System, Assistant Professor, Department of Neurosurgery, University of Pittsburgh Medical Center (UPMC), Visiting Assistant Professor, Department of Neurosurgery, University of Virginia Medical Center (UVA), Charlottesville Virginia

Key concepts and best practices in diagnosis, initial and definitive management of acute traumatic brain injury (TBI). This class features assessment guidelines as well as treatment recommendations from Dr. Cohen-Inbar drawn from his extensive academic and clinical experience. The information is beneficial to both pre-hospital and hospital clinicians.

(1.5 Hours BLS: T, ALS: NCCP State/Local)
D) EMS Care 2020 and Beyond  
**Presenter: Ted Delbridge, MD, MPH, MIEMSS Executive Director**

2020 brings new challenges to the EMS clinician. Population health outcomes, new technology, and substance abuse require proper knowledge, assessment, and well-planned interventions. Dr. Delbridge will explore how to better care for our patients as we move into a new decade of health care delivery.

*(1.5 Hrs BLS: L, ALS: NCCP Individual)*

E) How to Save a Life, Yours!  
**Presented by The Public Safety Group, Wake Forest, NC**

In this day and age heart disease, stroke and diabetes are not discriminatory, however those that do not take care of themselves can find themselves in the front of the pack when it comes to SCA or CVA. Dispatchers for the most part live very unhealthy lives; we add unnecessary stress on ourselves and create our own negative environments. We eat unhealthy foods, drink unhealthy drinks, sit too long, and put ourselves at risk for metabolic syndrome. The communications center is a breeding ground for many personality types and low morale. This class will share some life/hand caring education and techniques to assist in the reduction of unnecessary medical issues, improve working relationships, and improve morale.

*(6 Hrs BLS: L, ALS: NCCP Individual)*

F) Fire Class – Held at MFRI - Western Maryland Regional Training Center  
**Block 1 - Fire Scene Preservation and Arson Awareness / ATF Accelerant Canine Detection Program Overview**

**Instructor: S/DSFM Oliver Alkire, ATF Certified K9 Handler, Department of State Police, Office of the State Fire Marshal-Northeast Regional Office**

This block will cover fire department responsibilities and partnership with the fire investigator to make early identification of possible arson fire cause indicators. Additionally, the student will learn how to properly preserve the scene and possible evidence used to determine the origin and cause of fires during overhaul stages. Information will be provided on when and how to request a fire investigator to a scene and students will have an opportunity to ask questions. There will also be a demonstration of an accelerated detection canine team and an overview on how the canine assists the investigator.

**Block 2 - Explosive, Clandestine Labs, & IED Awareness / Firework Display Safety Guidelines**

**Instructors: DSFM Mike Redding, Bomb Technician, Department of State Police, Office of the State Fire Marshal-Bomb Squad; M/DSFM Edward Ernst, Bomb Technician, Department of State Police, Office of the State Fire Marshal-Western Regional Office**

Members of the State Fire Marshal Bomb Squad will provide an overview to first responders on explosives and improvised explosive devices (IED's), secondary explosions, and clandestine labs. This block will cover basic awareness and possible indicators of explosives or suspected IED, clan labs, and suspect packages that first responders could potentially come across. There will be a discussion on scene safety and staging until Bomb Squad personnel can arrive on the scene. The second half of the block will cover fireworks and their potential dangers. Additionally, students will learn about public firework displays and the role that the fire department has in ensuring a safe event.

**Block 3 - Fire and Life Safety Considerations for Festival & Fairs / Residential Sprinklers, Smoke Alarms and CO Detectors Facts and Fiction**

**Instructors: Mr. Joseph Goodrich, Fire Safety Inspector II, Department of State Police, Office of the State Fire Marshal-Western Regional Office; Mr. Larry Iseminge, Fire Protection Engineer, Department of State Police, Office of the State Fire Marshal-Western Regional Office**

This block will cover the fire and life safety code considerations for fire and EMS personnel at festivals, fairs, and other large public gatherings. Specifics about emergency access lanes through crowds, tents, and campers will be covered as well as challenges that firefighters and EMS clinicians could encounter. There will also be a discussion about the dangers of portable food vendors, food trucks, and CO poisoning as well. The second half of this block will discuss residential sprinklers, facts, and fiction. A Fire Protection Engineer will discuss basic design considerations of residential sprinkler installations. Information will also cover Maryland's smoke alarm and CO detector requirements. There may be a live burn demonstration of a sprinklered versus non-sprinklered room as well.

*(6 Hrs BLS: L, ALS: NCCP Individual)*

11:15 AM: Breakout Session 2

G) All Bleeding Stops: How to Manage Hemorrhagic Shock  
**Presenter: Francis X. Guyette, MD, MPH, Medical Director, STAT MedEvac, Associate Professor of Emergency Medicine, University of Pittsburgh**

Current, evidence-based best practices for the assessment and emergent treatment of hemorrhagic shock. Dr. Guyette shares a wealth of "real world" clinical treatment experience as well as significant research knowledge. This class is appropriate for both pre-hospital and hospital based clinicians.

*(1.5 Hrs BLS: T, ALS: NCCP National)*
(H) Airway Tips, Tricks, and Tools!
Presenter: Corporal W. B. Jansen, NREMT-P, FP-C, Trooper/Flight Paramedic, Maryland State Police Aviation Command, Training Section Lead-Hoist Instructor, UAS Team Supervisor, Special Operations Division-Tactical Medic
Understanding today’s challenges with airway management in the EMS field helps clinicians be prepared to manage some of the most critical airways. Being prepared means having a plan and being intimately familiar with the airway tools you have at your disposal.
(1.5 Hrs BLS: M, ALS: NCCP State/Local)

(I) BE FAST! - Cutting Edge Stroke Care
Presenter: Timothy P. Chizmar, MD, FACEP, State EMS Medical Director, MIEMSS
We will discuss the latest evidence and highlight best practices in EMS stroke care assessment and treatment. Through case studies and review of the latest literature, we will demonstrate how a timely EMS assessment, treatment and destination selection lead to improved outcomes for our acute stroke patients.
(1.5 Hrs BLS: M, ALS: NCCP 0.5 Hrs National & 1 Hr State/Local)

(J) Transporting Children Safely in Ambulances – Tools, Techniques and Training
Presented by EMSC Faculty
42,000 children are transported in ambulances across Maryland annually. EMS professionals are faced with all ages and sizes of patients and often their families. There are NHTSA and NASEMSO documents and a wide variety of both old and new devices on the market. Only some of which have been tested. This session will include a review of the principles, discussion of the current SAE standards for ambulances, and the future testing needed for evidence-based practice. Demonstration of the proper ways to secure a selection of available devices to a stretcher will be shared.
(1.5 Hrs BLS: M, ALS: NCCP National)

12:30 PM - 1:30 PM: Lunch and Visit Vendors

1:45 PM: Breakout Session 3

(K) Advanced Trauma Assessment
Presenter: Jason Layman, MSN, CRNP, ENP-C, FNP-C, Lead Advanced Practice Provider USACS, Western Maryland Health Systems ED
This course will provide you with the fundamental knowledge to systematically assess a critically injured trauma patient. You will be able to understand and demonstrate key assessment principles specific to the trauma patient and recognize life threatening abnormal findings.
(3 Hrs BLS: T, ALS: NCCP 1 Hr National & 2 Hrs State/Local)

(L) Thrill'em, Chill'em, and Bring Them Back Alive!: How to Prevent Secondary Injury and Improve Outcomes Following Cardiac Arrest
Presenter: Francis X. Guyette, MD, MPH, Medical Director, STAT MedEvac, Associate Professor of Emergency Medicine, University of Pittsburgh
Current best practices in the resuscitation of cardiac arrest, as well as prevention of secondary injury and improving patient outcome. Resuscitation science is rapidly evolving, and emergency providers must be familiar with the latest evidence and controversies surrounding resuscitative techniques. This class is appropriate for both pre-hospital and hospital based clinicians.
(1.5 Hrs BLS: M, ALS: NCCP National)

(M) Taking a Hard Look at Pediatric Deaths
Presenter: Richard Lichenstein, MD, FAAP, Region III Pediatric Medical Director
Trauma is the leading cause of death and disability in children across the nation, in Maryland, and in your community. Dr. Rich Lichenstein chairs the Maryland State Child Fatality Team working with local county and city teams to understand the causes and incidence of child deaths. EMS clinician participation is critical for local team reviews and to develop plans and implement changes to prevent child deaths. Come and learn what is behind the data and the programs that can educate families to prevent these deaths.
(1.5 Hrs BLS: M, ALS: NCCP Individual)

(N) MIEMSS – Incident Review Committee Case Reviews
Presenter: Ron Schaefer, MIEMSS Chief Compliance Officer
MIEMSS’ Compliance Office investigates complaints made against EMS Applicants and Clinicians that involve possible violations of COMAR Title 30 Prohibited conduct. Using actual incidents resulting in EMS Board Final Action and discussing serious issues in today’s EMS world, participants will: review and analyze several incidents; track information flow from ‘A - Z’ and beyond; discuss ‘Root Cause Analysis’ problem solving tools & techniques; and talk about COMAR Title 30 Due Process requirements for all EMS Clinicians.
(1.5 Hrs BLS: L, ALS: NCCP Individual)

3:00 PM: Break and Visit Vendors
3:15 PM: Breakout Session 4

(0) EMS DRUGS! - We Don't Always Play Well Together!
**Presenter:** Somi Rikhye, MD, Chair of Emergency Medicine, Ballad Health, Garrett County Jurisdictional EMS Medical Director

As the world of EMS changes, so do the drugs we use. It is imperative that we as clinicians not only understand them individually but collectively. The skill becomes critical thinking for whole patient care....what medications we choose or avoid may determine the quality of our treatment plan.

*(1.5 Hrs BLS: M, ALS: NCCP Individual)*

(P) Child Abuse/ Child Victimization: Battered, Broken and Burned
**Presenter:** Stephanie Sisler, MD, MIEMSS Region I Pediatric Medical Director

Children of all ages are at risk to be victims of abuse, and identification of early signs is key to linkages for protection. A difficult but important trauma topic for EMS clinicians is to understand their role, increase awareness, and provide critical documentation. As the first to respond when tragedy strikes, EMS professionals are critical witnesses to instances of child abuse and neglect.

*(1.5 Hrs BLS: T, ALS: NCCP 0.5 Hrs National & 1 Hr State/Local)*

(Q) MSPAC Aerial Rescue Operations: What YOU Need to Know
**Presented by:** MSPAC Training Staff

An MSPAC Aerial Rescue Operations overview course that will provide working knowledge needed for ground personnel to facilitate an aerial rescue mission. Topics covered within the class will include: aerial rescue operations, the decision making process, equipment familiarization, and safety concerns associated with helicopter operations.

*(1.5 Hrs BLS: L ALS: NCCP State/Local)*

4:30 PM: Seminar Ends
